

St. Margaret's Co-educational English Secondary & Primary School
S.3 Uniform Mock Test, 2025–2026
S.3 Integrated Business Fundamentals (M1)
Tourism and Hospitality Studies (T.H.S.)

Marking Scheme

SET A — ANSWER KEY

Section A: Multiple Choice Questions

Q1.	B. The temporary short-term movement of people to destinations outside where they normally live and work. Reference: Section 1.3.1 — Definition of Tourism, p.7
Q2.	C. An excursionist — visits a destination for less than 24 hours (returns same evening), not for transit. Reference: Section 1.3.1 — Excursionist, p.7
Q3.	B. A Taipei resident travelling to Kaohsiung for a weekend — travel within their own country. Reference: Section 1.4.3 — Domestic Tourism, p.10
Q4.	C. Outbound; inbound. — HK residents going abroad = HK outbound; foreigners visiting HK = HK inbound. Reference: Section 1.4.2 — Outbound and Inbound Tourism, p.10
Q5.	A. (1) and (2) only — HKTb and online travel agencies are Tourism Promoters (2nd layer). Cathay Pacific (airline) and Marriott (hotel) are Service Suppliers (3rd layer). Reference: Section 1.2 — Integrated Model of Tourism, p.3
Q6.	B. (1) and (3) only — Airline companies and hotel chains are Tourism Service Suppliers. Direct marketing companies and tourist boards are Tourism Promoters. Reference: Section 1.2 — Key Elements, p.3
Q7.	B. A government relaxes its visa requirements to attract more tourists. Visa policies are a political force. Note: mobile apps = technological; pollution = environmental; exchange rates = economic. Reference: Section 1.2 — Political Forces, p.4
Q8.	B. The development of jet airplanes made large-scale international tourism possible. This is a technological force directly stated in the handout. Reference: Section 1.2 — Technological Forces, p.4
Q9.	C. Least adventurous; stays in their "environmental bubble" with a fully pre-planned itinerary throughout the trip. Reference: Section 1.9 — Cohen's Classification: Organised Mass Tourist, p.39
Q10.	B. (1) and (3) only. Drifters keep away from hotels (1) ✓ and live with locals (3) ✓. They do NOT have pre-planned itineraries (2) X and do NOT stay in the "environmental bubble" (4) X. Reference: Section 1.9 — Drifter, p.40

Q11.	B. Book a fully structured package tour to a familiar beach resort. Psychocentrics prefer familiar destinations and heavily structured itineraries. Reference: Section 1.10 — Plog's Classification: Psychocentric, p.41
Q12.	C. Cultural tourism — motivated by learning and experiencing another culture; visiting traditional arts and food culture. Reference: Section 1.7 — Cultural Tourism, p.16
Q13.	B. Religious traveller. "During the flight, they may ask the direction of the aircraft so as to pray to a holy center of their belief." Reference: Section 1.6 — Religious Travelers, p.12
Q14.	B. (1) and (3) only — Niagara Falls and the Amazon Rainforest are natural attractions. The Great Wall = famous construction (man-made); Disneyland = theme park (man-made). Reference: Section 1.8 — Natural Attractions, p.19-22
Q15.	C. Historic relics. Terra Cotta Warriors and Crown Jewels are explicitly listed as examples of Historic Relics in the handout. Reference: Section 1.8 — Historic Attractions, p.28-29
Q16.	C. A tourist's desire to escape from the pressures of daily urban life. This is an internal psychological motivation = push factor. Options A, B, D are all destination attributes = pull factors. Reference: Section 1.11 — Push Factors, p.45
Q17.	B. (1) and (3) only — natural scenery and historic landmarks are destination attributes = pull factors. (2) need for relaxation and (4) desire for social interaction are internal motivations = push factors. Reference: Section 1.11 — Pull vs Push Factors, p.45-46
Q18.	B. Length of stay, purpose of visit, and distance travelled. Reference: Section 1.3.2 — The Defining Factors of Tourism, p.8
Q19.	B. Marketing and business — helps understand the promotion and marketing of tourism products. This is explicitly stated in the handout, p.1. Reference: Section 1.1 — Tourism as an Integrated Discipline, p.1
Q20.	A. (1) and (2) only. HKTB = Tourism Promoter ✓. Palace Museum = Tourism Promoter/Destination ✓. Rosewood Hong Kong = hotel = Tourism Service Supplier (3rd layer) X. Reference: 2025 DSE P1 Q1

Section B: Data-Based Questions

Q1.	Scenario: The Lee Family Trip to Japan (15 marks)
(a)	Define "tourist" and "excursionist". Give ONE example for each. (4 marks) Tourist: A person who travels to destinations outside his/her residence and working place, and stays for at least 24 hours, for the purpose of leisure or business. (Section 1.3.1) (1 mark)

	Example: (1 mark) E.g. A Hong Kong resident spending 3 nights in Tokyo on holiday. (Accept any valid example of an overnight stay away from home country/usual environment.) Excursionist: A person who temporarily visits a destination and stays for less than 24 hours, for the purpose of leisure or business, but not for transit. (Section 1.3.1) (1 mark) Example: (1 mark) E.g. A Hong Kong resident visiting Shenzhen for shopping and returning home the same day. (Accept any valid same-day trip.)
(b)	Identify the type of tourist (Cohen's classification) with TWO pieces of evidence. (3 marks) Type: Organised Mass Tourist. (1 mark) Evidence 1: (1 mark) "The entire trip was booked through a travel agency" — dealt with in a routine way by tourist establishments such as a travel agency; itinerary decided in advance. Evidence 2: (1 mark) "The itinerary was fully pre-arranged with no changes allowed" — tourists have almost no decisions on their trip; staying in their environmental bubble.
(c)	Identify the type of attraction for (i) Osaka Castle and (ii) Traditional Japanese dance performance. (4 marks) (i) Osaka Castle: Type: Historic attraction / Historic site. (1 mark) Reason: (1 mark) It is a famous historic building with special significance in relation to historical events; included in the handout's "Historic Attractions" category. (Section 1.8, p.28) (ii) Traditional Japanese dance performance: Type: Cultural attraction (Music and dance). (1 mark) Reason: (1 mark) "Music and dance are probably the most entertaining and appealing cultural attractions for tourists." (Section 1.7 / 1.8, p.30)
(d)	Identify ONE Tourism Promoter and ONE Tourism Service Supplier with explanations. (4 marks) Tourism Promoter: Travel agency / Tour guide. (1 mark) Explanation: (1 mark) Travel agencies provide services such as making travel arrangements and giving advice on tourism-related matters. They are in the first layer (closest to travellers) of the Integrated Model. (Section 1.2, p.3) Tourism Service Supplier: Airline / Hotel. (1 mark) Explanation: (1 mark) Airlines and hotels provide transportation/accommodation services to travellers, usually independently. They are in the third layer (Tourism Service Suppliers) of the Integrated Model. (Section 1.2, p.3)
Q2.	Scenario: Top 5 International Tourist Arrivals 2019 (15 marks)
(a)	Define "international tourism" and give ONE example from the source. (2 marks)

	Definition: (1 mark) International tourism involves trips between 2 countries. International tourists are those who travel to a country other than the one in which they normally live. (Section 1.4.1, p.9) Example: (1 mark) A Hong Kong resident visiting France / A Japanese tourist visiting the United States. (Accept any valid cross-border example using countries from the source.)
(b)	From China's perspective, Chinese tourists visiting France represent which type of tourism? (2 marks) Type: Outbound tourism. (1 mark) Explanation: (1 mark) Visits by Chinese residents to France (another country) represent China's OUTBOUND tourism. From France's perspective, these visitors are inbound tourists. (Section 1.4.2, p.10)
(c)	Identify THREE pull factors attracting tourists to France. Explain each. (6 marks) (2 marks per pull factor: 1 for identification + 1 for explanation. Accept any three of the following.) Pull factor 1: Natural scenery / Climate France has beautiful landscapes (Alps, Loire Valley) and a pleasant climate. Tourists seek attractive scenery and comfortable climatic conditions for their holiday. (Section 1.8 / 1.11) Pull factor 2: Historic and cultural attractions France has world-famous historic sites and art museums (e.g. the Louvre, Palace of Versailles, Eiffel Tower). Tourists are attracted by the beauty of architecture and art, or for their historical/cultural meaning. (Section 1.8) Pull factor 3: Food and cuisine French cuisine is internationally renowned. "Trying new food is a novel experience that is enjoyed by most tourists." (Section 1.8, p.30) Food differences are one of the most interesting ways to learn about another culture. Other acceptable pull factors: favourable exchange rates; strong political/cultural ties; famous events (e.g. Cannes Film Festival); natural and man-made attraction combination.
(d)	Explain whether the Hong Kong resident is classified as a "tourist" using THREE defining factors. (5 marks) Factor 1 — Length of stay: (1 mark) Stays 10 days, which is less than one year. The visit is temporary and short-term. ✓ Factor 2 — Purpose of visit: (1 mark) Main purpose is sightseeing (leisure), NOT earning income at the destination. ✓ Factor 3 — Distance travelled: (1 mark) Travelling from Hong Kong to France is outside their "usual environment" — not a routine community trip between home and workplace. ✓ Conclusion: (2 marks) The resident meets ALL three defining factors and IS classified as a tourist. (Section 1.3.2, p.8)
Q3.	Scenario: Eco-Tourism in the Amazon

	(15 marks)
(a)	Identify the form of tourism. Explain with TWO pieces of evidence. (3 marks) Form: Eco-tourism. (1 mark) Evidence 1: (1 mark) "All income from entrance fees and donations is used for conservation of the rainforest." — Eco-tourism income is spent on conservation; it is "a force for conservation and preservation of nature." (Section 1.7, p.16) Evidence 2: (1 mark) "Travellers are reminded to minimise their environmental impact throughout the trip." — Eco-tourists "will minimise their impact on the environment." (Section 1.7, p.16)
(b)	Identify THREE types of tourist attractions. State natural/man-made and give evidence. (6 marks) (2 marks each: 1 for type + natural/man-made, 1 for evidence. Accept any three.) Type 1: Natural attraction — Fauna/Wildlife (natural) Evidence: "Tourists can observe rare animals such as jaguars, river dolphins, and exotic birds in their natural habitat." (Section 1.8 — Natural vegetation and wildlife, p.22) Type 2: Natural attraction — Natural vegetation / Tropical rainforest (natural) Evidence: "Amazon Rainforest in Brazil" — lush tropical vegetation. Tropical rainforests are listed in the handout as tourist attractions. (Section 1.8, p.25) Type 3: Cultural attraction — Handicrafts / Traditions (man-made) Evidence: "Local indigenous communities...demonstrate traditional cooking and craft-making skills." — Handicrafts and lifestyle are cultural attractions. (Section 1.8, p.29-30)
(c)	According to Plog's classification, which tourist type does this tour target? Give TWO characteristics. (3 marks) Type: Allocentric tourist. (1 mark) Characteristic 1: (1 mark) "Prefer non-tourist destinations and few developed tourist attractions." / "Enjoy discovering new destinations before others have visited them." Evidence: the Amazon is an off-the-beaten-path destination. (Section 1.10, p.41-42) Characteristic 2: (1 mark) "Prefer simple services, such as adequate to good accommodations." Evidence: "Stay in basic but adequate accommodation rather than luxury hotels." (Section 1.10, p.42)
(d)	State ONE push factor and ONE pull factor for this eco-tour. Explain each. (3 marks) Push factor: (1 mark — 0.5 for identification + 0.5 for explanation) Any valid internal motivation, e.g. desire for adventure / desire to escape urban pressures / desire for social interaction / desire for self-education. Push factors are "intangible desires of the individual traveller." (Section 1.11, p.45) Pull factor: (2 marks — 1 for identification + 1 for explanation) Any valid destination attribute, e.g. unique Amazon wildlife / lush tropical rainforest / cultural experience with indigenous communities / conservation opportunities. Pull factors are the "attractiveness or drawing power of the destination." (Section 1.11, p.45-46)

	Note: Do not award marks if student confuses push and pull factors (e.g. gives an internal motivation as a pull factor or vice versa).
--	--

SET B — ANSWER KEY

Section A: Multiple Choice Questions

Q1.	C. (C) is INCORRECT. A patient staying abroad for 13 months exceeds the "less than one year" rule → cannot be a tourist. All other rows (A, B, D) are correctly classified. Reference: 2025 DSE P1 Q2
Q2.	C. Exchange students on SHORT-TERM courses are NOT tourists — they are also considered to be in their "usual environment" because studying is a routine activity. Note: Diplomats (A), airline crews (B), and military personnel stationed overseas (D) are likewise NOT tourists. All four options are non-tourists; the DSE selects C as the answer because short-term exchange students are the most commonly confused case — they appear to travel like tourists, but their study routine places them within their usual environment. Reference: 2024 DSE P1 Q6
Q3.	A. (1) and (3) only. (1) Daily Shenzhen commuter = within usual environment X. (3) 14-month exchange = exceeds 1-year rule X. (2) Retired couple, 2 weeks = tourist ✓. (4) 3-day conference = tourist ✓. Reference: Section 1.3.2 — Defining Factors of Tourism, p.8
Q4.	D. (3) and (4) only = second order effects. Airline employees spending wages (3) and hotel operators reinvesting profits (4) are second order. (1) and (2) are first order effects (direct tourist spending / direct payment by tourism businesses). Reference: 2024 DSE P1 Q3
Q5.	B. (1), (3) and (4) only. HKTB (1) ✓ Promoter. Cathay Pacific (2) X = Service Supplier. Meeting planners (3) ✓ Promoter. Car rental (4) ✓ = Service Supplier — the pairing states "Service Suppliers" so (4) is correctly matched. Reference: Section 1.2 — Integrated Model of Tourism, p.3
Q6.	B. (1), (3) and (4) only. Airbnb = Technological ✓. Political instability = Political force, NOT Economic X → (2) is wrong. Hong Kong Pals = Social/Cultural ✓. Pollution = Environmental ✓. Reference: Section 1.2 — External Environment Forces, p.4
Q7.	B. (1) and (3) only. (1) Organised mass tourist ✓. (2) Explorer description matches Drifter X. (3) Individual mass tourist ✓. (4) Drifter description matches Explorer X. Reference: Section 1.9 — Cohen's Classification, p.39-40
Q8.	A. (1) and (3) only. Early exploration stage attracts allocentrics (1) ✓. Psychocentrics prefer popular/familiar destinations (2) X. Allocentrics enjoy discovering before others (3) ✓. Reference: 2025 DSE P1 Q4 adapted; Section 1.10 — Plog's Classification, p.41
Q9.	B. (1), (3) and (4) only. Business tourism ✓. Disneyland = leisure/holiday tourism, NOT eco-tourism X. Study tourism ✓. VFR ✓. Reference: Section 1.7 — Forms of Tourism, p.14-18

Q10.	D. (2), (3) and (4) only. (1) WRONG — toys/special meals for CHILDREN, not senior travellers. (2) ✓ Religious meals. (3) ✓ Up to 28 weeks. (4) ✓ Guide dogs for blind. Reference: Section 1.6 — Tourists with Special Needs, p.12-13
Q11.	B. (1), (3) and (4) only. Olympic Games ✓, Munich Beer Festival ✓, Cannes Film Festival ✓ = Events. The Louvre (2) = History Museum = Cultural Attraction, NOT an event. Reference: Section 1.8 — Special Events and Festivals, p.36
Q12.	B. (1), (3) and (4) only — Temperature, Relative Humidity, and Wind. These three are explicitly listed in the handout. Rainfall is not mentioned as a comfort element. Reference: Section 1.8 — Climate and Human Comfort, p.21
Q13.	B. (1), (2) and (4) only. The marketing message promotes destination attributes = pull factors: natural attractions (1) ✓, cultural attractions (2) ✓, food (4) ✓. "Desire for adventure" (3) is an internal tourist motivation = push factor, NOT from the destination. Reference: Section 1.11 — Pull Factors, p.45-46
Q14.	B. (1), (2) and (3) only. (1) Geography & history ✓. (2) Marketing & business ✓. (3) IT & global distribution system ✓. (4) WRONG — Religion & culture provides information on cultural resources, NOT financial returns. Reference: Section 1.1 — Tourism as an Integrated Discipline, p.1-2
Q15.	B. (1) and (3) only. Tropical rainforests → eco-tourism & bird watching (1) ✓. Savannas → wildlife expeditions, NOT cycling/horse-riding (2) ✗. Tundra → wildlife expeditions (3) ✓. Temperate forests → cycling/horse-riding, NOT wildlife safaris (4) ✗. Reference: Section 1.8 — Vegetation and Animals table, p.25
Q16.	B. (1), (3) and (4) only. (1) ✓ Non-typical destinations. (2) ✗ Business travel is PRICE-INELASTIC — lower prices do NOT increase demand. (3) ✓ Not affected by seasonality. (4) ✓ Higher standard of service. Reference: Section 1.7 — Business Tourism, p.16
Q17.	B. (1), (3) and (4) only. Currency control (1) ✓ macro. Personal desire for adventure (2) ✗ = individual push factor (micro). Economic development (3) ✓ macro. Tourism trends (4) ✓ macro. Reference: Section 1.11 — Macro Factors, p.47
Q18.	B. "Keep traveller's cheques, credit cards, and cash all in the SAME place" — this is NOT recommended. The handout states: "Keep them in SEPARATE places." All other options (A, C, D) are correctly recommended. Reference: Section 1.5 — Money and Valuables, p.11
Q19.	B. (1), (3) and (4) only. (1) ✓ "Not really tourists in the conceptual sense." (2) ✗ They do NOT usually buy accommodation. (3) ✓ Consume food from host's supermarkets. (4) ✓ Mainland China, Canada, Australia named in handout. Reference: Section 1.7 — VFR Tourism, p.18

Q20.	A. (1) and (2) only. No fixed itinerary, lives with locals, takes odd jobs = Drifter (1) ✓. Prefers unusual areas, explores before others = Allocentric (2) ✓. Psychocentric prefers familiar places (3) ✗. Drifters are non-institutionalised (4) ✗. Reference: Section 1.9 (Cohen) + Section 1.10 (Plog)
-------------	---

Section B: Data-Based Questions

Q1.	Scenario: The Chan Family Trip to Hong Kong (15 marks)
(a)	Identify the types of attractions of Mai Po Nature Reserve and Chung Ying Street. (4 marks) Mai Po Nature Reserve: Type: Natural attraction / Natural vegetation & wildlife. (1 mark) Explanation: (1 mark) Mai Po is a wetland nature reserve featuring mangroves where tourists observe birds and wildlife in their natural habitat. It is a natural, not man-made, attraction. (Section 1.8, p.22-25) Chung Ying Street at Sha Tau Kok: Type: Cultural attraction / Historic site. (1 mark) Explanation: (1 mark) Chung Ying Street is a unique boundary street with historical and cultural significance reflecting the relationship between Hong Kong and Mainland China. It has special significance in relation to historical events/people. (Section 1.8, p.28-29)
(b)	According to Cohen's classification, identify the tourist type with TWO pieces of evidence. (3 marks) Type: Individual Mass Tourist. (1 mark) Evidence 1: (1 mark) "They want to buy a package via a travel agency" — major arrangements still made through a tour agency. (Section 1.9, p.38) Evidence 2: (1 mark) "They would like to visit some unique and less touristy attractions" — they have some control over their itinerary and are not fully bound to a group, unlike the Organised Mass Tourist. (Section 1.9, p.38)
(c)	Which hotel is MORE suitable for the Chan family? Explain with THREE pieces of evidence. (4 marks) Hotel B is more suitable. (1 mark) Evidence 1: (1 mark) Hotel B has two queen beds — suitable for a family of four (two adults and two young children). Hotel A has only one Hollywood bed, which is insufficient for the family. Evidence 2: (1 mark) Hotel B has an outdoor playground, tricycle & bike rental, mini golf & mini bowling — more activities for children. Mrs. Chan prefers a family-friendly hotel with more activities for children. Evidence 3: (1 mark) Hotel B has a sea view room (Superior room: sea view), satisfying Mrs. Chan's preference for better scenery.

	Note on meal plans: European Plan = room only (no meals). Continental Plan = room + continental breakfast. Modified American Plan = room + breakfast + dinner. American Plan = room + all meals. Mr. Chan wants breakfast in the hotel → Hotel B's Continental Plan (HK\$3,800, includes breakfast) best meets his preference. Hotel A's Modified American Plan (HK\$4,200) includes breakfast and dinner, which also fits but costs more. Hotel B better meets the family's overall needs.
(d)	For each special request, identify the department and explain how it handles it. (4 marks) (Award 0.5 mark for correct department + 1 mark for explanation, × 3 requests. Remaining 0.5 mark for overall accuracy.) Request 1 — Airport pick-up: Department: Concierge / Transportation / Front Office. (0.5 mark) How: (1 mark) The department arranges a hotel car or third-party transportation to pick up the Chan family from the airport and transfer them to the hotel. Request 2 — Kids' amenities and extra towels: Department: Housekeeping Department. (0.5 mark) How: (1 mark) Housekeeping prepares and places kids' amenities (small towels, children's toiletries, cot/extra bedding if needed) and extra towels in the guest room before the family's arrival. Request 3 — Peanut allergy (3-year-old): Department: Food and Beverage (F&B) Department / Kitchen. (0.5 mark) How: (0.5 mark) The F&B department notes the allergy and ensures all meals served to the family (especially the younger child) contain no peanuts or peanut-derived ingredients.
Q2.	Scenario: Mr. and Mrs. Cheung's Stay at a Five-Star Resort, Papua New Guinea (15 marks)
(a)	Suggest TWO other services the concierge could provide. (2 marks) (1 mark each. Accept any two valid concierge services not mentioned in the scenario.) Service 1: Arranging transportation / taxi / car hire for sightseeing or airport transfer. Service 2: Providing maps, tourist information brochures, or recommendations on local attractions. Other acceptable answers: arranging tours/excursions; assisting with luggage storage; making reservations at other restaurants or facilities; arranging laundry or dry-cleaning services.
(b)	Identify the type of F&B service and explain with TWO pieces of evidence. (3 marks) Type: Table service / Full-service / Silver service. (1 mark) Evidence 1: (1 mark) "They were served by a designated staff member" — individual table service by an assigned waiter is characteristic of formal table service. Evidence 2: (1 mark) "Gentlemen need to wear suits and ladies need to wear evening gowns for dining" — the formal dress code indicates a fine dining / full table service restaurant.

(c)	Identify THREE service quality gaps (Parasuraman's Gap Model). Name, explain, and give evidence for each. (6 marks) (2 marks per gap: 1 for correct name + explanation, 1 for accurate evidence from scenario.) Gap 1: The Communication Gap (1 mark) Explanation: (0.5 mark) The gap between what the hotel promises/communicates to guests and what is actually delivered. Evidence: (0.5 mark) "The hotel claimed all rooms had sea views when the reservation was made. However, there was no sea view when they entered the room." — the communicated service did not match the delivered service. Gap 2: The Service Performance Gap / Service Delivery Gap (1 mark) Explanation: (0.5 mark) The gap between the service standards set by management and the actual service delivered by frontline staff. Evidence: (0.5 mark) "Due to a lack of staff, they waited over 45 minutes before being assigned a room." — actual service delivery fell below the expected standard for a five-star resort. Gap 3: The Knowledge Gap / Customer Expectations Gap (1 mark) Explanation: (0.5 mark) The gap between customer expectations and management's perception of those expectations. Evidence: (0.5 mark) "Staff brewed famous local hot coffee...but they were not keen on it due to the climate." — the manager misjudged what guests would enjoy in a hot tropical climate, suggesting a gap in understanding customer expectations.
(d)	Identify capital and currency of Papua New Guinea. Explain inbound or outbound from HK's perspective. (4 marks) Capital: Port Moresby. (1 mark) Currency: Papua New Guinean Kina (PGK). (1 mark) Type: Outbound tourism (from Hong Kong's perspective). (1 mark) Explanation: (1 mark) "Visits by residents of [a] country to another country is [that country's] outbound tourism." Mr. and Mrs. Cheung are Hong Kong residents travelling to Papua New Guinea. This represents Hong Kong's outbound tourism. From Papua New Guinea's perspective, they are inbound tourists. (Section 1.4.2, p.10)
Q3.	Source: Hotel A & B Comparison + Tour C Itinerary Leaflet (15 marks)
(a)	Identify the type of accommodation Hotel A belongs to. Explain with evidence. (2 marks) Type: Heritage hotel / Boutique hotel / Historic hotel. (1 mark) Evidence: (1 mark) "A former marine police station built in 1902 to combat pirates" — Hotel A was converted from a historic building, giving it unique historical value not found in conventional hotels. This is consistent with the handout's category of historic attractions converted for tourism use. (Section 1.8, p.28)

(b)	Identify THREE HKTB Hotel Classification indicators giving Hotel B a higher score. Explain with evidence. (6 marks) (2 marks per indicator: 1 for indicator + 1 for evidence from Table 1. Accept any three.) Indicator 1: Number of rooms / Scale (1 mark) Evidence: (1 mark) Hotel B has 298 rooms vs Hotel A's 9 rooms. A larger property with more rooms indicates a greater capacity and typically a higher classification score. Indicator 2: Facilities and services (1 mark) Evidence: (1 mark) Hotel B offers a swimming pool, spa, fitness centre, and 6 food & beverage outlets. Hotel A has only 1 restaurant. More diversified and comprehensive facilities contribute to a higher HKTB classification score. Indicator 3: Room rate / Standard of accommodation (1 mark) Evidence: (1 mark) Hotel B's average room rate (HK\$2,600/night) is double Hotel A's (HK\$1,300/night), reflecting a higher standard of accommodation and service quality. Other acceptable indicator: Location — Hotel B is in Central (prime commercial district) vs Lantau Island (remote), which may attract a higher-rated clientele and score.
(c)	Identify and explain THREE attributes of tourist attractions in Tour C with evidence. (6 marks) (2 marks per attribute: 1 for attribute + 1 for evidence from Source 2. Accept any three.) Attribute 1: Accessibility (1 mark) Evidence: (1 mark) "Luxury limousine service" and "Flexible pick-up & drop-off" — the tour removes transport barriers and makes the attractions easily accessible to visitors, stimulating tourist flows. (Section 1.8, p.20) Attribute 2: Cultural / Historic significance (1 mark) Evidence: (1 mark) "Join a guided tour of Hotel A to learn about its historical value" — Hotel A (former 1902 marine police station) has special significance in relation to historical events, classified as a historic attraction. (Section 1.8, p.28) Attribute 3: Activities / Experiential value (1 mark) Evidence: (1 mark) "Participate in DIY workshops to make traditional handicrafts" and "Try delicacies at the local seafood market" — variety of hands-on activities enhancing visitor engagement. (Section 1.8, p.29-30) Other acceptable attributes (with matching evidence from Source 2): Uniqueness / Authenticity — "Tour the fishing village to admire the stilt houses" / "Participate in DIY workshops to make traditional handicrafts" — unique, non-mainstream tourism experience offering genuine local culture. (Section 1.8, p.29-30) Educational value — "Join a guided tour of Hotel A to learn about its historical value" / "Professional & friendly tour guide" — tourists learn about history and culture, satisfying the desire for self-education. (Section 1.7, p.15) Combination of attraction types — Tour C combines natural scenery (stilt houses, village), cultural attractions (handicrafts, local food), and historic attractions (Hotel A), creating a strong tourist appeal. (Section 1.8, p.20)
(d)	According to Plog's classification, which tourist type is this person? Explain with ONE characteristic and ONE piece of evidence from Source 2. (3 marks)

	Type: Allocentric tourist. (1 mark) Characteristic: (1 mark) "Enjoy meeting people from foreign or different cultures" / "prefer non-tourist destinations and few developed tourist attractions" / "enjoy discovering new destinations before others have visited them." Allocentrics are motivated by cultural learning and authentic experience. (Section 1.10, p.41-42) Evidence from Source 2: (1 mark) "Join a guided tour of Hotel A to learn about its historical value" / "Participate in DIY workshops to make traditional handicrafts" / "Try delicacies at the local seafood market" — the tourist seeks authentic cultural learning rather than mainstream tourist activities, consistent with allocentric behaviour.
--	---

All questions may have more than one answer.

Other reasonable answers are accepted.

End of Marking Scheme
